

Required Disclosures – Industry Recognition

Awards and recognition by unaffiliated parties or publications is not a guarantee of future results and shall not be interpreted as any assurance that a client or prospective client will receive a certain level of results if they should choose to engage PrairieWood Wealth Management. Awards or recognition should not be construed as a current or past endorsement by any of our clients.

Rankings published by external parties are typically based exclusively on external information published in required disclosures such as Form ADV or on material submitted by the recognized adviser. PrairieWood Wealth Management never pays a fee to receive or to be considered for any award or ranking, but we may purchase plaques or pay for advertisements to publicize awards and rankings we have already received.

Citywire – PrairieWood Wealth Management:

1. Recognition: 50 Growers Across America – North Dakota #1 (2021)
2. Recognition: 50 Growers Across America – North Dakota #1 (2020)

The 50 Growers Across America award identifies the fastest growing Registered Investment Advisory (RIA) firms in each state. It is based on the most recent Form ADV data reported to the Securities and Exchange Commission. Only firms that manage more than \$100 million and which aren't affiliated on a firm level with a broker dealer or other institution (though a firm's employees may be dually registered) are considered. Only financial planning-oriented RIAs are included which is intended to exclude firms that are strictly money managers.

The selection process entailed no interaction with the firms which means the RIAs selected did not ask to be selected. There was no compensation for consideration or recognition, and for that matter, there was nothing an RIA could do to avoid being named. The mention of an RIA as a fastest grower is not an endorsement of its services or its business.
